---

Eric,

I found 3 very small things in the comments table. I'm not sure how important the coding for comments is, but on pages 24 and 25, I think that the two "comm" codes should be changed to "CE" or "edit" because there are some corrections/actions requested in those comments. Also on page 28, I think you meant "NT" rather than "NE."

That's all. I hope all the feedback you get about the comments is as easy to implement as mine.

We are planning on having a TCT meeting on Wednesday, January 2, 2008 beginning at 9:00 am. We will use most of the time to discuss the status of the Round 2 Report Comments. I am attaching the latest version of the comments for your review. As before, areas that require input or discussion are highlighted in blue; names are bolded.

I am not sure there is anything to discuss regarding the field efforts. I did get an email from Helle that the pentachlorophenol lamprey toxicity test was completed and that the diazinon had arrived. The diazinon test should begin after the new year.

I am also not sure if there is anything much to discuss on the early actions but I will let Sean be the judge of that.

Regarding the deliverables:

Mobility Testing: PMX is reviewing the mobility testing memo. Please provide any comments by January 11th.

Treatability Studies Literature Review: We are really waiting for comments from Eric Stern on this one. Comments are expected by December 31st.

Temporal Change FSP: Comments were due by last Friday. Our recommendation is for the LWG to not implement the FSP and to assume no or negligible degradation in the fate and transport model. I have drafted a letter that will go out next week. If you get me something by the COB on Wednesday, January 2nd, I still may be able to use it.

Final Sediment FSP and QAPP Addendum: This is really a loose end that we will approve when we have the time.

Regarding the Round 2 Report - all comments must be to me NLT than January 4th. At that time we will make a final decision about the delivery date of the comments and what will be included. As I have stated previously, the HHRA and ERA comments are the highest priority. In addition, there may be some stand alone pieces that can be submitted later in January.

As usual, the TCT number is available (Non-[REDACTED]; access code Non-[REDACTED]) and we will be in Room C, DEQ NWR in Portland.

Wishing everyone a Happy New Year.

Thanks, Eric
